

INTERNAL REFERENCE

Brand & Build Specification

The complete reference for rebuilding the Vektor document suite in any future session — brand rules, colour values, component specifications, margin decisions, and standing panel rulings.

10	Quick Reference — Key Values

01

Purpose of This Document

Why this document exists and how to use it.

This document captures every decision made during the development of the Vektor document library — brand rules, colour values, component specifications, typographic hierarchy, margin decisions, and the standing rulings of the Delphi advisory panel. It exists for one purpose: so that any future Claude session, starting from scratch with no memory of previous conversations, can rebuild any document in the Vektor suite with full consistency.

Without this document, a new session will produce documents that are competent but not consistent. Small differences in spacing, colour application, or component styling will accumulate and break the coherence the panel worked to establish across twelve documents.

How to use this document: paste the contents of this file into a new Claude session along with the build scripts listed in Section 07. Say: 'Please rebuild [document name] using these brand specifications and build scripts.' The session will have everything it needs to produce a consistent result.

02

The Canonical Colour Palette

Three colours. Each one earns its place. These hex values are fixed.

NAME	HEX	VARIABLE	ROLE & RULES
Near-black	#0A0A0F	BG	Primary page background (PDF). Canonical dark ground. Word docs: C.DARK_H = '0A0A0F' for dark table headers.
Platinum	#E8E8EC	PLATINUM	Primary mark colour. All letterforms in the Vektor logo. Section title text in PDFs.
Amber Gold	#C8A96E	GOLD	Accent. Single use in primary mark: arrowhead strokes only. In docs: tags, metric numbers, gold rules, card top bars. NEVER decorative.
Off-white	#E8E2D9	OFF_WHITE	Body text in PDFs (on dark bg). Maps to #1A1A1F in Word (white bg).
Warm grey	#9A9086	WARM_GREY	Secondary text, captions, sub-labels, footer text, body_grey paragraphs.
Major rule	#5A5A60	RULE_MAJ	Section divider rules (1.0pt). Platinum-toned. NOT gold — critical panel ruling.
Minor rule	#2A2828	RULE_MIN	Thin dividers within sections (0.3–0.4pt). Dim grey.
Card bg	#111116	CARD_BG	Surface for cards, tables, metric blocks in PDFs.
Note bg	#16161A	NOTE_BG	Surface for NoteBox and aside boxes in PDFs.
Step bg	#131210	STEP_BG	Metric card surfaces in PDFs.
Card edge	#242428	CARD_EDGE	Border colour for all card and table edges in PDFs.

CRITICAL COLOUR RULES — PANEL DECISIONS

Gold appears ONCE in the primary mark.

On the arrowhead strokes only. Not on the V, not on EKTOR, not on the sub-brand. The moment gold appears on more than one element it becomes decoration.

Section rules are platinum-toned, not gold.

RULE_MAJ (#5A5A60) is used for all section dividers. This was a specific panel ruling after the original gold rule treatment was rejected as contradicting the document's own colour argument.

Sub-headings are warm grey, not platinum.

WARM_GREY (#9A9086) for sub_head style. Platinum is reserved for section_title only. Platinum sub-heads create a hierarchy collision.

Contents block numbers are platinum, not gold.

Gold is not a navigational colour — this was changed after panel review.

The Founder's Note left bar is platinum, not gold.

RULE_MAJ bar colour. Gold bars are reserved for the single closing page rule only.

03 Typographic Hierarchy

PDF uses Helvetica (built into ReportLab). Word uses Arial throughout.

PDF DOCUMENTS — REPORTLAB STYLES

STYLE	FONT	SIZE	COLOUR	NOTES
cover_label	Helvetica	7pt	WARM_GREY	Document type tag. Letter spacing 4. ALL CAPS.
cover_title	Helvetica-Bold	24pt	PLATINUM	Cover main title. Leading 30.
cover_distil	Helvetica-Oblique	11pt	WARM_GREY	Cover distillation. Leading 19. Italic.
section_tag	Helvetica	7pt	WARM_GREY	Section number + label. Letter spacing 4. ALL CAPS.
section_title	Helvetica-Bold	18pt	PLATINUM	Section headline. Leading 24.
section_sub	Helvetica	11pt	WARM_GREY	Section sub-headline. Leading 17.
sub_head	Helvetica-Bold	8.5pt	WARM_GREY	Sub-heading. Letter spacing 2. ALL CAPS. SpaceBefore 16pt.
body	Helvetica	9.5pt	OFF_WHITE	Body text. Leading 17. Justified.
body_grey	Helvetica	9.5pt	WARM_GREY	Secondary body. Leading 17. Justified.
wp_section	Helvetica-Bold	14pt	PLATINUM	White paper section heading.
wp_subsection	Helvetica-Bold	11pt	GOLD	White paper sub-section heading.
wp_lead	Helvetica-Oblique	10pt	WARM_GREY	White paper lead-in italic summary.
pull_quote	Helvetica-Oblique	11pt	PLATINUM	Pull quote. Leading 18. Centred.
founder_label	Helvetica	7.5pt	GOLD	Founder's Note label. Letter spacing 3.5. Sits OUTSIDE and ABOVE box.
founder_note	Helvetica-Oblique	10pt	WARM_GREY	Founder's Note body. Leading 17.
metric_num	Helvetica-Bold	16pt	GOLD	Metric card number. Centred.

STYLE	FONT	SIZE	COLOUR	NOTES
footer	Helvetica	6.5pt	#444440	Footer text. Centred. All later pages.
wp_ref	Helvetica	7.5pt	#555550	Captions, document identifiers.

WORD DOCUMENTS — ARIAL STYLES

All Word documents use Arial. Background is white — brand identity expressed through colour accents. Key values (in half-points, 2× the point size):

- Heading 1: Arial Bold 40 half-pts (#1A1A1F), spacing before 280 after 120, outlineLevel 0
- Heading 2: Arial Bold 28 half-pts (#1A1A1F), spacing before 240 after 80, outlineLevel 1
- Body text: Arial 20 half-pts (#1A1A1F), justified, spacing after 100
- Section tags: Arial Bold 14 half-pts (#C8A96E), characterSpacing 80, ALL CAPS
- Gold rule: Paragraph border bottom, size 12, color #C8A96E, space 4
- Footer: Arial 14 half-pts (#9A9086), gold top border, right tab stop at CONTENT_W

04

Page Layout & Margins

All documents use A4. The following constants must not be approximated.

PDF CONSTANTS — `vektor_styles.py`

`W, H = A4 # 595.27 × 841.89 points`

`MARGIN_L = 22*mm # Left margin`

`MARGIN_R = 22*mm # Right margin`

`MARGIN_T1 = 16*mm # Cover and first pages`

`MARGIN_T2 = 46*mm # Later pages — WITH PERSISTENT HEADER`

`MARGIN_B = 20*mm # Bottom margin`

`COL_W = W - MARGIN_L - MARGIN_R # Usable column width`

CRITICAL: MARGIN_T2 was increased from 38mm to 46mm during the session to fix a header overlap issue. Any future rebuild **MUST** use 46mm. Using 38mm will cause the persistent header to collide with the top of the content frame on all later pages.

THREE PAGE TEMPLATES

Cover

Frame at (0, 0, W, H) — full bleed. Dark BG drawn on canvas. Logo centred. No header. No footer rule (closing page uses gold footer rule).

First

Frame at (MARGIN_L, MARGIN_B, COL_W, H-MARGIN_T1-MARGIN_B). No persistent header. Footer present.

Later

Frame at (MARGIN_L, MARGIN_B, COL_W, H-MARGIN_T2-MARGIN_B). Persistent header drawn at H-MARGIN_T2+14. Footer present.

PERSISTENT HEADER — LATER PAGES

— Logo: height 22px at (MARGIN_L, H-MARGIN_T2+14). Width scales from PNG aspect ratio.

— Page subtitle + number: Helvetica 7pt #555550, right-aligned at (W-MARGIN_R, H-MARGIN_T2+18).

— Separator rule: 0.4pt RULE_MIN, drawn at y=H-MARGIN_T2+8, from MARGIN_L to W-MARGIN_R.

FOOTER — ALL PAGES

— Separator rule: 0.3pt RULE_MIN at y=MARGIN_B-2.

— Footer text: Helvetica 6.5pt #444440, centred at y=MARGIN_B-11.

— Format: "Vektor by InvestPuppy · investpuppy.com · [subtitle] · May 2026"

WORD — PAGE CONSTANTS

PAGE_W = 11906 DXA (A4 width)

PAGE_H = 16838 DXA (A4 height)

MARGIN = 1134 DXA (~2cm all sides)

CONTENT_W = PAGE_W - MARGIN*2 = 9638 DXA

05

Component Specifications

Custom Flowable classes defined in `vektor_styles.py`. Each must be implemented exactly.

HRule — Horizontal Rule

`HRule(width, color=RULE_MIN, thickness=0.5, spaceAbove=5, spaceBelow=5)`

— Major section rule: `HRule(COL_W, color=RULE_MAJ, thickness=1.0, spaceAbove=2, spaceBelow=4)`

— Minor section rule: `HRule(COL_W, color=RULE_MIN, thickness=0.3, spaceAbove=4, spaceBelow=3)`

— Gold closing rule: `HRule(COL_W, color=GOLD, thickness=0.8)` — closing page only

NoteBox — Editorial Aside

`NoteBox(width, text, style, bg=NOTE_BG, bar_color=RULE_MAJ, pad_h=15, pad_v=13, bar=4)`

— Default bar colour: `RULE_MAJ` (platinum-toned). Gold bars only in specific Why Vektor boxes.

— Background: `NOTE_BG` (#16161A). Rounded corners 3pt. `CARD_EDGE` border 0.4pt.

FounderNoteBox

`FounderNoteBox(width, text, style, pad_h=16, pad_v=14, bar=4)`

— Bar colour: `RULE_MAJ` — was originally gold, changed to platinum after panel review.

— Label placement: `OUTSIDE` and `ABOVE` the box as separate Paragraph — never inside the box.

ScreenshotCard — Platform Interface Preview

`ScreenshotCard(width, img_path, caption, styles, max_img_h=120*mm, pad=10, label='PLATFORM INTERFACE')`

— Sizing rule: Scale by `WIDTH` first: `scale = min(inner_w/iw, max_img_h/ih)`. Critical — prevents landscape screenshots rendering as tiny strips.

— White inner frame: 2pt padding only (not 4pt). `rect()` not `roundRect()` for inner frame.

— Research env label: Use `label='RESEARCH ENVIRONMENT'` for Jupyter notebook screenshots.

MetricCard — Key Metric Display

`MetricCard(width, number, label, context, styles)`

— Layout: Groups of 4 across `COL_W`. Card height 54pt + context text below.

— Number: Helvetica-Bold 18pt GOLD centred.

— Label: Helvetica 7.5pt WARM_GREY centred (word-wrapped at 14 chars).

CTABox — Call to Action

CTABox(width, headline, body, ask, url, styles)

— Structure: Full-width. Gold 3pt bars top + bottom. Gold 1.2pt border all sides. CARD_BG.

— Contents: Headline (cta_head, gold), body text, Vektor logo centred, CTA ask, URL with hyperlink.

CoverPage — Document Cover

CoverPage(W, H, doc_type, title, description, audience, logo_path)

— Logo position: ly = $H \times 0.52$. lw = $\min(W \times 0.62, 320)$. lh scales proportionally.

— Gold rule: At ly-18, full page width.

— Doc type: WARM_GREY, letter-spaced, below rule at rule_y-22.

— Title: Helvetica-Bold 20pt PLATINUM. Lines split on \n. Each centred.

— Bottom section: RULE_MAJ separator at y=36mm. Audience at 28mm. Ref at 22mm. Date at 16mm.

PullQuoteBox

PullQuoteBox(width, text, style, pad_h=24, pad_v=18)

— Panel ruling: NO card background. Platinum rules top+bottom only (RULE_MAJ, 1.0pt). Open space between.

06

Document Register

Every document in the library with its fixed number, reference, and build script.

#	DOCUMENT	REFERENCE	BUILD SCRIPT
00	Vektor at a Glance	—	build_extras.py → build_executive_summary()
01	Why Vektor	—	build_final_suite.py → build_why_vektor()
02	Brand Story	—	build_final_suite.py → build_brand_story()
03	WP-01: Portfolio Construction	IP-WP-QPC-260430- 1.2	build_final_suite.py → build_white_paper()
04	Platform Brochure	—	build_brochure_final.py → build()
WP-00	Research Series Index	—	build_extras.py → build_series_index()
WP-02	Per-Instrument Signal Optimisation	IP-WP-SIG-260501- 1.0	build_white_papers.py → build_wp02()
WP-03	Capital Allocation Precision	IP-WP-CAP-260501- 1.0	build_white_papers.py → build_wp03()
WP-04	Technical Indicator Grid Search	IP-WP-TIS-260501- 1.0	build_white_papers.py → build_wp04()
WP-05	Multi-Currency Infrastructure	IP-WP-FX-260501-1 .0	build_white_papers.py → build_wp05()
WP-06	Audit Trail & Compliance	IP-WP-AUD-260501- 1.0	build_white_papers.py → build_wp06()
INT	Document Journey Guide (internal)	—	build_journey_guide.py → build()

07

File Structure & Dependencies

What must be present to rebuild any document.

REQUIRED FILES

`vektor_styles.py`

MUST be present first. All scripts import from this. Contains brand constants, styles, Flowable classes.

`/home/claude/vk2-work/VEKTOR-transparent-v3.png`

Vektor logo with transparent background. Used on every page of every PDF. Path: `/mnt/user-data/uploads/VEKTOR-transparent-v3.png` (update LOGO_PATH if different).

`build_brochure_final.py`

Brochure with UC01 screenshots. Set SC = path to your 11 screenshot PNGs.

`build_final_suite.py`

Why Vektor, Brand Story, WP-01.

`build_white_papers.py`

WP-02 through WP-06.

`build_extras.py`

At a Glance + Research Series Index.

`build_journey_guide.py`

Internal Document Journey Guide.

`build_word_docs.js`

All 12 Word documents. Requires Node.js + docx@9.6.1.

PYTHON INSTALLATION

```
pip install reportlab Pillow --break-system-packages
```

NODE.JS INSTALLATION

```
npm install -g docx
```

BUILD ORDER

1. `python3 build_final_suite.py # 01, 02, 03`
2. `python3 build_brochure_final.py # 04` (use this, not `build_final_suite` for brochure)
3. `python3 build_white_papers.py # WP-02 through WP-06`
4. `python3 build_extras.py # 00, WP-00`
5. `python3 build_journey_guide.py # Internal journey guide`
6. `node build_word_docs.js # All 12 Word documents`

08

Standing Panel Decisions

Rulings made by the five-expert Delphi advisory panel. Fixed. Do not change without explicit instruction.

BRAND ARCHITECTURE

Vektor leads. InvestPuppy is the maker's mark.

BY INVESTPUPPY in spaced full capitals at approximately one-quarter the cap height of VEKTOR. This hierarchy is fixed.

InvestPuppy is NOT a 'tech lab'.

This positioning was specifically considered and unanimously rejected by the panel. The current framing — InvestPuppy as founding entity, Vektor as the product — is correct and must not be changed.

The Founder's Note is the correct response to the name question.

It declares. It does not explain. The Brand Story's Founder's Note is the canonical treatment.

BRAND STORY SPECIFIC

"Every element earns its place. Nothing is decorative." — appears exactly twice.

Once in the Brand in One Paragraph (page 6 of the Brand Story). Once on the closing page. It was removed from the cover distillation in the final iteration. Do not add it back to the cover.

"THE BRAND IN ONE PARAGRAPH" section tag was removed.

The paragraph stands alone without announcement. Do not reintroduce the section tag.

Brand in One Paragraph is open italic text — not boxed.

This was a specific panel ruling. Boxing it signals supplementary when it should signal definitive.

Pull Quote has no card background.

Platinum rules top and bottom, open space between. The card background was removed after panel review.

TECHNICAL DECISIONS

MARGIN_T2 = 46mm.

Increased from 38mm to fix header overlap on later pages. Any future session must use 46mm.

Screenshots sized by WIDTH first.

$\text{scale} = \min(\text{inner_w}/\text{iw}, \text{max_img_h}/\text{ih})$. Prevents landscape screenshots rendering as tiny strips.

Series label is "VEKTOR RESEARCH SERIES · 2026".

Not "InvestPuppy Research Series" — changed after panel identified brand hierarchy inconsistency.

Overfitting section in WP-04 is mandatory.

Must include three mitigations (bounded search, Sharpe objective, daily re-optimisation) and the candour note acknowledging the limitation.

Regulatory standing note is mandatory in Why Vektor and WP-06.

Present but not detailed — available on request.

INTENTIONALLY ABSENT — DO NOT ADD

The following are intentionally absent from all documents. Do not include unless explicitly instructed: founder name — not disclosed. Regulatory standing detail — available on request only. Social proof / reference clients — available on request only. Post-trade audit trail — on roadmap with IBKR. Formal walk-forward validation — on roadmap.

09

How to Rebuild in a New Session

Follow these steps to rebuild any document with full consistency.

Step 1 — Provide context

Start the new session with: 'I am working on the Vektor document library for InvestPuppy (investpuppy.com). I need to rebuild [document name]. Please read the attached Brand Specification Document before doing anything.'

Step 2 — Upload this document

Upload this Brand & Build Specification (PDF or Word version). Claude will read all colour values, component specifications, margin decisions, and panel rulings before starting.

Step 3 — Upload the build scripts

Upload the relevant scripts from the ZIP file. At minimum: `vektor_styles.py` and the specific build script for the document you need. For the brochure, also upload the screenshot PNGs.

Step 4 — Upload the logo

Upload `VEKTOR-transparent-v3.png`. Required for every PDF document. Claude will need to confirm the `LOGO_PATH` variable points to the uploaded file location (`/mnt/user-data/uploads/`).

Step 5 — Specify the change precisely

Tell Claude exactly what changed — which document, which section, which paragraph, and the exact new text. The more specific you are, the more accurate the rebuild will be.

Step 6 — Verify before distributing

Always open the rebuilt PDF and verify the change is correct and surrounding formatting is intact before distributing. Check the page of the change and the pages immediately before and after.

Consistency guarantee: Claude cannot guarantee pixel-perfect consistency across sessions for subjective spacing decisions caused by different text lengths. What WILL be consistent: colours, component behaviour, margins, typography hierarchy, and all brand rules captured here.

10

Quick Reference — Key Values

The five constants that must never change and the key values to verify.

FIVE THINGS THAT MUST NOT CHANGE

1. MARGIN_T2 = 46mm (not 38mm) — header overlap fix.
2. Section rules = RULE_MAJ (#5A5A60) not gold.
3. Sub-headings = WARM_GREY (#9A9086) not platinum.
4. Screenshot sizing: scale by width first, not height.
5. Series label: 'VEKTOR RESEARCH SERIES' not 'InvestPuppy Research Series'.

KEY CONSTANTS — COPY EXACTLY

```
LOGO_PATH = "/mnt/user-data/uploads/VEKTOR-transparent-v3.png"
DOC_DATE = "May 2026"

BG = colors.HexColor("#0A0A0F") # near-black page background
PLATINUM = colors.HexColor("#E8E8EC") # primary type
GOLD = colors.HexColor("#C8A96E") # accent — arrowhead only in mark
OFF_WHITE = colors.HexColor("#E8E2D9") # body text on dark background
WARM_GREY = colors.HexColor("#9A9086") # secondary text
RULE_MAJ = colors.HexColor("#5A5A60") # major rules — PLATINUM-TONED NOT GOLD
RULE_MIN = colors.HexColor("#2A2828") # minor rules — dim grey
CARD_BG = colors.HexColor("#111116") # card surfaces
NOTE_BG = colors.HexColor("#16161A") # NoteBox background
CARD_EDGE = colors.HexColor("#242428") # card borders
MARGIN_T2 = 46*mm # CRITICAL — not 38mm
```

Every element earns its place. Nothing is decorative.

Deployment sequence: 00 At a Glance → 04 Brochure → 01 Why Vektor → 03 WP-01 → 02 Brand Story → Proof Partners conversation → WP-02 through WP-06.
