

Due Diligence Navigation Guide

Which document answers which question — a reading guide for institutional partners working through the full Vektor document suite.

For Proof Partners and institutional due diligence teams

IP-DDG-260501-2.0

May 2026

The Vektor document suite now contains twenty documents, including four new additions in vk5. This guide tells you which one to read in response to the question you are actually trying to answer. It is not a catalogue — it is a navigation tool. The recommended sequence for a Proof Partner due diligence process is at the end.

IF YOUR QUESTION IS COMMERCIAL

Start here. These documents make the commercial case.

Vektor at a Glance

Answers: What is Vektor, and why does it exist?

One page. Start here for any first conversation.

What We Are Not

Answers: What does Vektor not do? What are the scope limitations and honest disclosures?

Nine explicit statements of limitation, followed by six IS statements. Read this before the brochure. The most differentiated document in the suite. In START HERE folder and QUICK-SEND. Reference:

IP-WVIN-260508-1.0.

Why Not the Incumbents?

Answers: How does Vektor compare to Bloomberg PORT, FactSet, Excel, robo-advisory, or building in-house?

Honest assessment of five alternatives. Written by practitioners who used these platforms professionally before building Vektor. Includes honest notes where an alternative may be the better answer. Reference:

IP-WNIC-260508-1.0.

Platform Brochure

Answers: What does Vektor actually do, step by step?

The eleven-step workflow with screenshots. The most complete overview of the platform in operation.

Why Vektor

Answers: What is the commercial argument for systematic portfolio management?

The market problem, the DPM workflow, the Proof Partners proposition. Contains a summary of the Proof Partners programme on page 6.

Proof Partners programme

Answers: What exactly is the Proof Partners programme? What are the commercial terms, obligations, and programme mechanics?

The complete programme specification: what partners receive, what they commit to, slot availability, the twelve-month founding period, and the three-step path to engagement. Read this after Why Vektor for the full programme detail. Reference: IP-PPR-260515-1.0.

The Vektor Brand Story

Answers: Who built this and why?

The origin story and the philosophy behind the platform.

IF YOUR QUESTION IS METHODOLOGICAL

How the quantitative engine works.

WP-01: Quantitative Portfolio Construction

Answers: How does the portfolio construction process work end to end?

The foundational paper. Five-stage framework with a worked SGX example. Start here before reading any other white paper.

WP-02: Per-Instrument Signal Optimisation

Answers: How does Vektor select the right indicator for each instrument?

The grid search methodology and XGBoost validation layer.

WP-03: Capital Allocation Precision

Answers: How do portfolio weights become actual share quantities?

Lot rounding, cash buffer, and capital allocation efficiency.

WP-04: Technical Indicator Selection

Answers: What are the six indicators, and how are parameters optimised?

Full parameter space specification and overfitting controls.

WP-05: Multi-Currency Portfolio Infrastructure

Answers: How does Vektor handle portfolios across multiple currencies?

FX rate collection, position-level conversion, base currency configuration.

WP-10: Evaluating Performance Without a Track Record

Answers: What metrics should I use to evaluate a systematic strategy?

Sharpe ratio, drawdown, benchmark comparison, signal decay, walk-forward validation. Essential reading before reviewing any Vektor strategy output.

IF YOUR QUESTION IS ABOUT GOVERNANCE & COMPLIANCE

Controls, audit trail, and regulatory alignment.

WP-06: Audit Trail & Compliance Architecture

Answers: What is the audit trail? Who approves what?

The three-role model, complete action logging, compliance architecture. The first white paper a compliance officer should read.

WP-08: AI as Instrument

Answers: Where is AI used? Can the machine trade without human approval?

Governing principle, human approval gates, MAS FEAT / SFC / FCA alignment.

WP-09: Risk & Limitation Disclosure

Answers: What are the platform's risks and limitations?

Fourteen identified risks across four categories with mitigations in place and those on the roadmap. Read before any risk committee presentation.

Mutual NDA

Answers: What confidentiality terms govern our discussions?

Singapore law primary. Requires review by qualified Singapore solicitor before use.

IF YOUR QUESTION IS TECHNICAL

Infrastructure, integration, and architecture.

WP-07: Production Infrastructure & Technical Architecture

Answers: How is the platform built? Can it integrate with our existing infrastructure?

AWS service inventory, architecture diagram, decision log, data flows, integration patterns, region-agnostic deployment, and current deployment status. For CTOs and technical due diligence teams.

Workflow Integration Guide

Answers: What does adopting Vektor mean for the way I work today?

Task-by-task workflow map — what Vektor replaces, augments, and leaves unchanged. Covers Bloomberg integration, existing PMS connectivity, and the DPM without a PMS.

IF YOUR QUESTION IS OPERATIONAL

Day-to-day use and getting started.

Frequently Asked Questions

Answers: Quick answers to the fifteen questions that come up in every conversation.

Plain language. Two pages. Useful leave-behind for any meeting.

RECOMMENDED SEQUENCE — PROOF PARTNERS DUE DILIGENCE

For a partner working through the full suite for the first time. Each step builds on the previous one.

Before beginning this sequence, sign the InvestPuppy mutual NDA. The Founder Story document (ip-founder-story-v2.docx) is delivered at signing and should be read first.

STEP	DOCUMENT	PURPOSE
1 ★	Founder Story	Understand who built the platform and why — delivered at NDA signing, before the documentation suite
2	Vektor at a Glance	Establish the platform's proposition and the problem it solves — in two minutes
3	What We Are Not	Read the explicit constraint list before the pitch. Honest self-limitation is the basis for everything that follows
4	Why Not the Incumbents?	Understand where Vektor sits relative to every serious alternative
5	Platform Brochure	Understand the full workflow and platform capability
6	Why Vektor	Evaluate the commercial argument and Proof Partners programme summary
7	Workflow Integration Guide	Understand how Vektor fits your existing workflow before committing to the programme
8 ★	Proof Partners programme	Understand the full programme structure before entering due diligence
9	WP-01: Quantitative Portfolio Construction	Understand the quantitative methodology foundation
10	WP-09: Risk & Limitation Disclosure	Assess platform risk with full information before evaluating outputs
11	WP-10: Evaluating Performance Without a Track Record	Acquire the vocabulary to evaluate strategy outputs
12	WP-06: Audit Trail & Compliance Architecture	Review governance and audit trail
13	WP-08: AI as Instrument	Assess AI governance and regulatory alignment
14	WP-07: Technical Architecture	Technical due diligence — infrastructure and integration
15	WP-02 through WP-05	Deep methodology review as required
16	Mutual NDA	Establish confidentiality terms for detailed commercial discussions

Note for UK-based readers. Vektor is currently distributed in Singapore, configured and validated on SGX (Singapore), LSE (UK), and US equities. UK commercial distribution is subject to regulatory review. Managers based outside Singapore may engage through InvestPuppy directly. UK-based prospective partners should contact contact@investpuppy.com before proceeding beyond this guide. We will confirm what applies to your jurisdiction before any further documentation is shared.

Questions not answered by any document in the suite should be directed to contact@investpuppy.com. All documents available at investpuppy.com.
