

VEKTOR · BOUTIQUE · EARLY COMMITMENT

Proof Partners

The early-commitment programme for boutique DPMs, EAMs, independent wealth managers, and family offices committing before the platform has a live track record.

A Proof Partner is committing before the live track record exists — before the platform has executed in a live account. That is the nature of the commitment, and it is acknowledged openly. In exchange, the commercial terms reflect that commitment permanently. The Proof Partners are the proof: of the platform's credibility, of the methodology's rigour, and of InvestPuppy's ability to deliver before the market has confirmed it.

For prospective Proof Partners only — strictly confidential

InvestPuppy · IP-PPR-260515-1.0 · May 2026

SHOW US A MANDATE

Show us a mandate. We'll show you the platform.

Pick any listed equity market, any currency, any benchmark. We will run the full Vektor workflow against it and show you the output: the efficient frontier, the correlation matrix, the max-Sharpe allocation, and the per-instrument signal selection. No slides. No promises. Just the platform, working on your data.

THE PATH TO BECOMING A PROOF PARTNER

STEP 1

NDA

We sign a mutual NDA. Your mandate details stay confidential from the first word.

STEP 2

Due diligence

We share the full documentation suite — nineteen Vektor documents covering commercial, operational, and technical due diligence, plus ten Unvarnished papers documenting the failure modes this platform was built to avoid. You assess the methodology, risk framework, and technology. The founding team is available to answer every question directly.

STEP 3

Proof of concept

Pick any listed equity market, any currency, any benchmark. We run the full Vektor workflow on your data: the efficient frontier, the correlation matrix, the max-Sharpe allocation, per-instrument signal selection. No slides. No promises. The platform, working on your mandate.

STEP 4

Commercial

If the proof of concept works for your operation, we discuss a commercial arrangement under Proof Partner terms. If it does not, we tell you honestly — and the conversation is over without obligation on either side.

WHAT PROOF PARTNERS RECEIVE

These are not standard vendor benefits.

They reflect a specific reality: you are committing before the platform has a live track record. What follows is exactly what we commit in return. Every item below is a defined obligation, not a marketing statement.

01 — PREFERENTIAL COMMERCIAL TERMS

S\$18,000/year

12-month Proof Partner rate — 25% below the standard Entry tier (S\$24,000/year), in recognition of your commitment at the earliest stage of the platform's commercial history.

From year two: preferential commercial terms locked for the duration — at one tier below your current AUM tier, with Entry tier (S\$24,000/year) as the permanent floor. A partner whose AUM grows from S\$75M to S\$400M pays the Growth tier rate (S\$48,000/year), not the Institutional rate (S\$108,000/year) — permanently, for the duration of the relationship. The benefit scales with your growth. It does not expire.

02 — DIRECT ROADMAP INFLUENCE

Proof Partners participate in structured quarterly roadmap sessions with the founding team. Partner requirements are tracked explicitly. Where a requirement applies across the platform, it is prioritised accordingly. Where it is specific to the founding partner's workflow, it is addressed as part of the mandate — this is what founding means.

03 — DIRECT ACCESS TO THE PEOPLE BUILDING IT

At Proof Partner stage, your team has direct access to the founding team — not a sales representative or a support ticket queue. Questions about methodology, architecture, and roadmap are answered by the people who wrote the code and the papers.

04 — YOUR MANDATE BECOMES THE LIVE TRACK RECORD

The first Proof Partner produces the platform's live performance history. That track record belongs to both parties. A platform with a Proof Partner's mandates in live production is a fundamentally different proposition from a platform seeking its first client. You are not a beta tester. You are the proof.

05 — YOU SHAPE THE PLATFORM, NOT INHERIT IT

Every production platform reflects the requirements of the clients who were there at the start. Proof Partners define the workflows, approval structures, reporting formats, and integration priorities that the platform is built around. Partners who arrive later inherit those decisions.

Three Proof Partner slots.

The Proof Partners programme is limited to three slots. Once full, it closes. Subsequent clients subscribe at standard AUM-tier pricing without Proof Partner terms. This is not a scarcity mechanism. It reflects the founding team's commitment to the quality of engagement at this stage — three partners receiving genuine founding-level attention is more valuable than thirty receiving less.

STANDARD AUM-TIERED PRICING — FOR REFERENCE

Tier	AUM	Standard rate	Proof Partner rate
Entry	Up to S\$75M	S\$24,000/year	S\$18,000/year (yr 1)
Growth	S\$75M – S\$250M	S\$48,000/year	Growth rate (yr 2+)
Institutional	S\$250M – S\$750M	S\$108,000/year	Growth rate (yr 2+)
Enterprise	S\$750M+	From S\$168,000/year	Institutional rate (yr 2+)

The Proof Partners programme is open to wealth teams managing listed equity mandates across any exchange and currency. If your mandate includes fixed income or alternatives, enquire anyway — we will tell you honestly where we stand.

Institutional enquiries: If you manage an institutional DPM desk or have specific infrastructure or data governance requirements, the Proof Partners programme is designed for boutique and independent practitioners. The Alloy Partners programme is designed for institutional development partnerships. See [ip-alloy-partners.pdf](#) or contact InvestPuppy directly.

Pricing philosophy: Vektor pricing is published openly and held consistently. It is not inflated to create negotiating room. Structured commercial flexibility exists for two

defined reasons: multi-year subscription commitments, and reference partnerships where both parties receive something of genuine value. Outside those structures, the published rate applies. We set prices we can defend — and we defend them. This pricing policy applies consistently across all clients. That is what honest by design means in practice.
